

Heavy Duty
BREAK•AWAY®
ICY BLAST
 Stock No. C-14

**Icy Spray Cracks through Rust for Deeper Lubricant Power!
 Added Corrosion Inhibitor**

Cyclo Break•Away Icy Blast delivers a cold spray to **freeze, crack and blast** apart rust and corrosion. Lubricant goes deep with more muscle to free stubborn and stuck locks, bolts, nuts, fasteners, hinges, joints and more.

Use on engines, machines or anywhere parts are not responding to ordinary penetrants.

DIRECTIONS: Always read all directions before starting. 1. Aim nozzle 8-10" away from surface. 2. Spray for a minimum of 10 seconds. Extremely stuck parts may require additional spray time. 3. Wait 60-90 seconds for penetrant to soak through cracks. Gently knock sprayed parts. Repeat if needed.

NOTE: NOT FOR SALE IN CALIFORNIA (see C-14C for C.A.R.B. compliant Icy Blast).

Now Colder & Stronger Than Ever!
