

TECHNICAL DATA

WHITE POLISHING COMPOUND

Stock No. 07610

07610

Cleans & Shines

No.7[®] White Polishing Compound is a moderately strong abrasive cleaner for removing minor scratches and rough layers of weathered surfaces from enamel paint & fiberglass finishes. It levels rough surfaces to restore smooth reflections.

- Excellent for blending repairs and removing surface scratches and stains
- Removes heavy traffic film and weathered paint
- Provides smooth, shiny surface quickly and easily

Directions: 1. Make pad of soft, dampened cloth. Work in a small amount of compound. 2. Apply to car finish with back and forth strokes. For best results, start with light pressure and increase until desired result is achieved. Rinse and wring pad frequently. 3. As compound dries, rub with less pressure to get shine. 4. Buff with clean, dry cloth. 5. To protect finish, apply Rally[®] or No.7[®] Car Waxes. Recommended for professional use with electric buffer.

NOTE: Not recommended for use on **clearcoats**, vinyl, metalized plastic trim, simulated wood, decals, rubber bumpers, or flat paint surfaces. Recommended for professional use with electric buffer.

CAUTION: Contains mild abrasives that may remove or scratch paint if rubbed too forcefully. Test first in an inconspicuous area. For **clearcoat** finishes, use No.7 Clearcoat Polishing Compound.

PHYSICAL PROPERTIES

Size:	Net Wt. 10 oz. / 284 g	Cases per pallet	143
Package:	Plastic Tub	Cases per layer	13
Flash Point:	212°F (100°C)	Layers per pallet	11
Specific Gravity (H ₂ O=1):	1.236@25°C	Cube	0.38
Appearance:	Brown, creamy paste	Case Weight	10
Solubility in Water:	Completely soluble	UPC (Can)	0 89269 07610 0
		UPC (Carton)	1 00 89269 07610 7
