

## DIESEL FUEL INJECTOR CLEANER

Stock No. C-21

One of the most sensitive and expensive components of a diesel engine is the fuel injection system. Cleanliness in the diesel fuel system and injectors is important because of the close tolerances of injector nozzles and the injector pump. All diesel fuels tend to form varnish, gum and carbon on injectors which can harm performance and waste fuel. These deposits attack the diesel engine where it's most vulnerable – at the injectors and injector nozzles. As injectors and injector nozzles gradually become plugged, it is harder to ignite the fuel. The result is black smoke. Cyclo is designed to prevent gum and other residues from building up in the fuel delivery system and to disperse the residue so that it is carried into the combustion chamber and safely out of the engine. This action helps keep the injectors clean and operating efficiently, which also acts to reduce smoking. Keeping the injectors and injector nozzles clean helps maintain proper spray pattern for efficient combustion.

Cyclo Diesel Fuel Injector Cleaner meets Cummins L-10 superior performance levels for diesel injector cleanliness.

Cyclo used regularly helps:

- Cleans injectors
- Reduce smoke emissions
- Provide fuel stability during storage
- Replace lubricity for low sulfur fuel
- Saves fuel
- Restores power
- Reduce filter plugging
- Reduce corrosion & rust

Use every 1,500 miles.

### PHYSICAL PROPERTIES

Size:	32 fl. oz./946 liters	Cases per pallet	54
Package:	Plastic Bottle	Cases per layer	9
Flash Point:	144°F(62°C)	Layers per pallet	6
Boiling Point:	365°F - 417°F (185°C - 215°C)	Cube	0.9
Specific Gravity (H <sub>2</sub> O=1):	0.768	Case Weight	25
Appearance:	amber liquid	UPC (Bottle)	0 89269 00021 1
Solubility in Water:	Insoluble	UPC (Carton)	1 00 89269 00021 8
